Education

Puducherry Technological University — Puducherry, India
B.Tech CSE (CGPA: 8.55/10) — *September 2023 – May 2027*

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks

Experience

Bluestock — Pune, Maharashtra
SDE Intern — *November 2025 – December 2025*

- Developed a responsive web application using **React.js** and **Tailwind CSS**, delivering an intuitive user interface and improving user engagement.
- Collaborated remotely with the development team to design and implement **RESTful APIs** using **Node.js** and **Express.js**.
- Integrated secure **JWT-based authentication** for user authorization and protected API access.

Projects

URL Shortener | *Node.js, Express.js, MongoDB, Redis, Docker* — **Take a look**

- Designed and developed a production-ready URL shortening service using **Node.js**, **Express.js**, **MongoDB**, and **Redis**, following a layered architecture with Repository-Service pattern for scalability and maintainability.
- Implemented Redis caching, request validation with **Joi**, configurable rate limiting, structured logging using **Winston**, and centralized error handling to improve application performance, reliability, and security.
- Containerized the complete application stack with **Docker** and **Docker Compose**, integrated interactive **Swagger** API documentation, and developed comprehensive unit, integration, and performance tests following production-oriented backend engineering practices.

BookMyHostel | *Java, Android Studio, SQLite, Firebase, XML* — **Take a look**

- Developed an Android application to streamline hostel room booking and complaint management, enabling students to browse, reserve, and manage rooms across multiple hostels through an intuitive mobile interface.
- Implemented secure user authentication with **Firebase**, local data persistence using **SQLite**, and role-based functionality including room booking, complaint management, notifications, and an admin dashboard.
- Designed a modular Android application using **Activities**, **Fragments**, **Geofencing**, and UI animations to enhance navigation, user experience, and location-aware functionality.

Email Spam Classification | *Python, Scikit-learn, Streamlit* — **Take a look**

- Built an email spam classification system using a **Multinomial Naive Bayes** model to classify emails as spam or legitimate.
- Developed an interactive web application using **Streamlit** for real-time email classification and model inference.
- Performed data preprocessing and model training in **Kaggle Notebooks** using **Pandas**, **NumPy**, and **Scikit-learn**, with exploratory data analysis and visualization using **Matplotlib** and **Seaborn**.

Achievements & Certifications

Data Structures & Algorithms
Solved 300+ problems on LeetCode, Codeforces, CodeChef, and GeeksforGeeks — *2024–Present*

Intro to Machine Learning — Kaggle
Skills: NumPy, Pandas, Scikit-learn — *June 2025*

Technical Skills

Programming Languages : C++, Python, SQL
Backend : Node.js, Express.js, REST APIs, JWT Authentication
Databases : MySQL, Redis
Developer Tools : Git, Docker, Postman, Linux (Ubuntu - using as primary OS)
Machine Learning : Scikit-learn, Pandas, NumPy
